

Demo Candidate

FICTIONAL DEMONSTRATION PROFILE

Frontend / Startup resume example

Senior Software Engineer

Hong Kong · fictional profile

candidate@example.com

Fictional demonstration profile. Software engineer building accessible interfaces, dependable APIs and reviewable automation. All experience below is synthetic.

Senior Software Engineer | Example Product Studio (fictional)

2022 – Present

Built a TypeScript operations workspace with clear state transitions and reviewable changes.

Developed Node.js APIs and PostgreSQL workflows with retries and traceable failure handling.

Partnered with designers and operators to simplify a recurring review task.

Software Engineer | Example Platform Lab (fictional)

2019 – 2022

Built accessible React components and reusable form patterns.

Added automated checks for core workflows and documented engineering trade-offs.

TypeScript · React · Node.js · PostgreSQL · Automated testing · Accessibility · API design
